Volume 37 (2004)

Volume 37 Number 1

A. Tortoriello and G. Pedrizzetti — 1 — **Flow-tissue interaction with compliance mismatch in a model stented artery**

V. Waide, L. Cristofolini, J. Stolk, N. Verdonschot, G.J. Boogaard and A. Toni — 13 — **Modelling the fibrous tissue layer in cemented hip replacements: experimental and finite element methods**

H.H. Bayraktar, E.F. Morgan, G.L. Niebur, G.E. Morris, E.K. Wong and T.M. Keaveny — 27 — **Comparison of the elastic and yield properties of human femoral trabecular and cortical bone tissue**

J. Rigau, R. Farré, X. Trepat, D. Shusterman and D. Navajas — 37 — **Oscillometric assessment of airway obstruction in a mechanical model of vocal cord dysfunction**

T. Villa, F. Migliavacca, D. Gastaldi, M. Colombo and R. Pietrabissa — 45 — **Contact stresses and fatigue life in a knee prosthesis: comparison between in vitro measurements and computational simulations**

A. Nazarian and R. Müller — 55 — **Time-lapsed microstructural imaging of bone failure behavior**

Y. Murayama, C.E. Constantinou and S. Omata — 67 — **Micro-mechanical sensing platform for the characterization of the elastic properties of the ovum via uniaxial measurement**

C. Bir, D. Viano and A. King — 73 — **Development of biomechanical response corridors of the thorax to blunt ballistic impacts**

L.J. Bhargava, M.G. Pandy and F.C. Anderson — 81 — **A phenomenological model for estimating metabolic energy consumption in muscle contraction**

C.K. Chong and T.V. How — 89 — **Flow patterns in an endovascular stent-graft for abdominal aortic aneurysm repair**

H. Maas, G.C. Baan and P.A. Huijing — 99 — **Muscle force is determined also by muscle relative position: isolated effects**

M. Pini, Ph. Zysset, J. Botsis and R. Contro — 111 — **Tensile and compressive behaviour of the bovine periodontal ligament**

R. Moe-Nilssen and J.L. Helbostad — 121 — **Estimation of gait cycle characteristics by trunk accelerometry**

D.W.A. Brands, G.W.M. Peters and P.H.M. Bovendeerd — 127 — **Design and numerical implementation of a 3-D non-linear viscoelastic constitutive model for brain tissue during impact**

Short communications

D.C. Meyer, H.A.C. Jacob, R.W. Nyffeler and C. Gerber — 135 — **In vivo tendon force measurement of 2-week duration in sheep**

J.-B. Morin and A. Belli — 141 — **A simple method for measurement of maximal downstroke power on friction-loaded cycle ergometer**

J.Z. Wu, R.G. Dong and A.W. Schopper — 147 **Analysis of effects of friction on the deformation behavior of soft tissues in unconfined compression tests**

L.-L. Tang, Y.-L. Wang, J. Pan and S.-X. Cai — 157 **The effect of step-wise increased stretching on rat calvarial osteoblast collagen production**

T.R. Duck, L.M. Ferreira, G.J.W. King and J.A. Johnson — 163 **Assessment of screw displacement axis accuracy and repeatability for joint kinematic description using an electromagnetic tracking device**

Book review

G. Dubini — 169 **Biomechanics: principles and applications**

Volume 37 Number 2

Editorial

I.A.F. Stokes — 171 **Special issue on spinal biomechanics**

Y. Petit, C.-É. Aubin and H. Labelle — 173 **Spinal shape changes resulting from scoliotic spine surgical instrumentation expressed as intervertebral rotations and centers of rotation**

S.M. Haddock, O.C. Yeh, P.V. Mummaneni, W.S. Rosenberg and T.M. Keaveny — 181 **Similarity in the fatigue behavior of trabecular bone across site and species**

G. Baroud, R. Falk, M. Crookshank, S. Sponagel and T. Steffen — 189 **Experimental and theoretical investigation of directional permeability of human vertebral cancellous bone for cement infiltration**

P. Pollintine, A.S. Przybyla, P. Dolan and M.A. Adams — 197 **Neural arch load-bearing in old and degenerated spines**

M.G. Gardner-Morse and I.A.F. Stokes — 205 **Structural behavior of human lumbar spinal motion segments**

S.J. Ferguson, K. Ito and L.-P. Nolte — 213 **Fluid flow and convective transport of solutes within the intervertebral disc**

S.B. Bruehlmann, P.A. Hulme and N.A. Duncan — 223 **In situ intercellular mechanics of the bovine outer annulus fibrosus subjected to biaxial strains**

E.C. Bass, E.V. Wistrom, C.J. Diederich, W.H. Nau, R. Pellegrino, J. Ruberti and J.C. Lotz — 233 **Heat-induced changes in porcine annulus fibrosus biomechanics**

K.P. Granata, G.P. Slota and B.C. Bennett — 241 **Paraspinal muscle reflex dynamics**

I. Kingma and J.H. van Dieën — 249 **Lifting over an obstacle: effects of one-handed lifting and hand support on trunk kinematics and low back loading**

Technical note

D.J. Goertzen, C. Lane and T.R. Oxland — 257 **Neutral zone and range of motion in the spine are greater with stepwise loading than with a continuous loading protocol. An in vitro porcine investigation**

Volume 37 Number 3

B.L. Kaptein and F.C.T. van der Helm — 263 **Estimating muscle attachment contours by transforming geometrical bone models**

P. Knez, K. Nelson, M. Hakimi, J. Al-Haidary, C. Schneider and T. Schmitz-Rixen 275 **Rotational in vitro compliance measurement of diverse anastomotic configurations: a tool for anastomotic engineering**

S.L. Waters 281 **A mathematical model for the laser treatment of heart disease**

H. Fischer, M. Weber, M. Eck, A. Erdrich and R. Marx 289 **Finite element and experimental analyses of polymer-based dental bridges reinforced by ceramic bars**

J.J. Elias, D.R. Wilson, R. Adamson and A.J. Cosgarea 295 **Evaluation of a computational model used to predict the patellofemoral contact pressure distribution**

J. De Hart, G.W.M. Peters, P.J.G. Schreurs and F.P.T. Baaijens 303 **Collagen fibers reduce stresses and stabilize motion of aortic valve leaflets during systole**

K.B. Shelburne, M.G. Pandy and M.R. Torry 313 **Comparison of shear forces and ligament loading in the healthy and ACL-deficient knee during gait**

M.T. Nieminen, J. Töyräs, M.S. Laasanen, J. Silvennoinen, H.J. Helminen and J.S. Jurvelin 321 **Prediction of biomechanical properties of articular cartilage with quantitative magnetic resonance imaging**

A.J.L. Walsh and J.C. Lotz 329 **Biological response of the intervertebral disc to dynamic loading**

H. Alderson and M. Zamir 339 **Effects of stent stiffness on local haemodynamics with particular reference to wave reflections**

S.J. Piazza, A. Erdemir, N. Okita and P.R. Cavanagh 349 **Assessment of the functional method of hip joint center location subject to reduced range of hip motion**

W. Wilson, C.C. van Donkelaar, B. van Rietbergen, K. Ito and R. Huiskes 357 **Stresses in the local collagen network of articular cartilage: a poroviscoelastic fibril-reinforced finite element study**

J.C. van der Linden, J.S. Day, J.A.N. Verhaar and H. Weinans 367 **Altered tissue properties induce changes in cancellous bone architecture in aging and diseases**

L.P. Li and W. Herzog 375 **Strain-rate dependence of cartilage stiffness in unconfined compression: the role of fibril reinforcement versus tissue volume change in fluid pressurization**

Y. Song, R.E. Debski, V. Musahl, M. Thomas and S.L.-Y. Woo 383 **A three-dimensional finite element model of the human anterior cruciate ligament: a computational analysis with experimental validation**

G.A. Ateshian, N.O. Chahine, I.M. Basalo and C.T. Hung 391 **The correspondence between equilibrium biphasic and triphasic material properties in mixture models of articular cartilage**

Short communications

S. Federico, W. Herzog, J.Z. Wu and G.L. Rosa 401 **A method to estimate the elastic properties of the extracellular matrix of articular cartilage**

T. Pylios and D.E.T. Shepherd 405 **Prediction of lubrication regimes in wrist implants with spherical bearing surfaces**

A. Cereatti, V. Camomilla and A. Cappozzo 413 **Estimation of the centre of rotation: a methodological contribution**

R.K. Fisher, T.V. How, A. Bakran, J.A. Brennan and P.L. Harris 417 **Outflow distribution at the distal anastomosis of infrainguinal bypass grafts**

421 **Letter to the Editor**

422 **Letter to the Editor**

423 **Author's response**

Volume 37 Number 4

T. Komura and A. Nagano, 425 **Evaluation of the influence of muscle deactivation on other muscles and joints during gait motion**

J.H. Kinney, J.R. Gladden, G.W. Marshall, S.J. Marshall, J.H. So and J.D. Maynard 437 **Resonant ultrasound spectroscopy measurements of the elastic constants of human dentin**

H. Miki, N. Sugano, K. Hagio, T. Nishii, H. Kawakami, A. Kakimoto, N. Nakamura and H. Yoshikawa 443 **Recovery of walking speed and symmetrical movement of the pelvis and lower extremity joints after unilateral THA**

J.J. Wang and K.H. Parker 457 **Wave propagation in a model of the arterial circulation**

M.A. King and M.R. Yeadon 471 **Maximising somersault rotation in tumbling**

Q.H. Zhang, S.H. Tan and S.M. Chou 479 **Investigation of fixation screw pull-out strength on human spine**

T.J. Mäkinen, J.K. Koort, K.T. Mattila and H.T. Aro 487 **Precision measurements of the RSA method using a phantom model of hip prosthesis**

L. Petrini, F. Migliavacca, F. Auricchio and G. Dubini 495 **Numerical investigation of the intravascular coronary stent flexibility**

S. Bensamoun, M.-C. Ho Ba Tho, S. Luu, J.-M. Gherbezza and J.-F. de Belleval 503 **Spatial distribution of acoustic and elastic properties of human femoral cortical bone**

J.D. Revell, M. Mirmehdi and D.S. McNally 511 **Musculoskeletal motion flow fields using hierarchical variable-sized block matching in ultrasonographic video sequences**

T.S. Kaneko, J.S. Bell, M.R. Pejcic, J. Tehranzadeh and J.H. Keyak 523 **Mechanical properties, density and quantitative CT scan data of trabecular bone with and without metastases**

J.-J. Chiu, L.-J. Chen, C.-N. Chen, P.-L. Lee and C.-I. Lee 531 **A model for studying the effect of shear stress on interactions between vascular endothelial cells and smooth muscle cells**

S.P. Kotha, Y.-F. Hsieh, R.M. Strigel, R. Müller and M.J. Silva 541 **Experimental and finite element analysis of the rat ulnar loading model—correlations between strain and bone formation following fatigue loading**

J.D. Currey 549 **Tensile yield in compact bone is determined by strain, post-yield behaviour by mineral content**

J. Lepetit, R. Favier, A. Grajales and P.O. Skjervold 557 **A simple cryogenic holder for tensile testing of soft biological tissues**

B.R. McCreadie, S.J. Hollister, M.B. Schaffler and S.A. Goldstein 563 **Osteocyte lacuna size and shape in women with and without osteoporotic fracture**

Short communications

J.H.-C. Wang, G. Yang, Z. Li and W. Shen 573 **Fibroblast responses to cyclic mechanical stretching depend on cell orientation to the stretching direction**

E. Forster, U. Simon, P. Augat and L. Claes 577 **Extension of a state-of-the-art optimization criterion to predict co-contraction**

M. Mansour, S. Spiering, C. Lee, H. Dathe, A.K. Kalscheuer, D. Kubein-Meesenburg and H. Nägerl 583 **Evidence for IHA migration during axial rotation of a lumbar spine segment by using a novel high-resolution 6D kinematic tracking system**

593 **Announcement**

Volume 37 Number 5

J.D. Kisiday, M. Jin, M.A. DiMicco, B. Kurz and A.J. Grodzinsky 595 **Effects of dynamic comp1ressive loading on chondrocyte biosynthesis in self-assembling peptide scaffolds**

T. Yanai 605 **Buoyancy is the primary source of generating body-roll in front-crawl swimming**

B.C. Bourne and M.C.H. van der Meulen 613 **Finite element models predict cancellous apparent modulus when tissue modulus is scaled from specimen CT-attenuation**

C.Y. Lin, N. Kikuchi and S.J. Hollister 623 **A novel method for biomaterial scaffold internal architecture design to match bone elastic properties with desired porosity**

E.C. Hardin, A. Su and A.J. van den Bogert 637 **Foot and ankle forces during an automobile collision: the influence of muscles**

S.E. Sonenblum, J.J. Crisco, L. Kang and E. Akelman 645 **In vivo motion of the scaphotrapezio–trapezoidal (STT) joint**

C.E. Tschirhart, A. Nagpurkar and C.M. Whyne 653 **Effects of tumor location, shape and surface serration on burst fracture risk in the metastatic spine**

A.S. Green 661 **Modelling of peak-flow wall shear stress in major airways of the lung**

E.W. Remme, P.J. Hunter, O. Smiseth, C. Stevens, S.I. Rabben, H. Skulstad and B. Angelsen 669 **Development of an in vivo method for determining material properties of passive myocardium**

I. Marshall, S. Zhao, P. Papathanasopoulou, P. Hoskins and X.Y. Xu 679 **MRI and CFD studies of pulsatile flow in healthy and stenosed carotid bifurcation models**

A.D. Heiner and J.A. Martin 689 **Cartilage responses to a novel triaxial mechanostimulatory culture system**

R.R. Lamberts, M.J.J.M.F. Willemsen, P. Sipkema and N. Westerhof 697 **Subendocardial and subepicardial pressure–flow relations in the rat heart in diastolic and systolic arrest**

B.M. Johnston, P.R. Johnston, S. Corney and D. Kilpatrick 709 **Non-Newtonian blood flow in human right coronary arteries: steady state simulations**

A.-R.A. Khaled and K. Vafai 721 **Analysis of oscillatory flow disturbances and thermal characteristics inside fluidic cells due to fluid leakage and wall slip conditions**

F.C. Anderson, S.R. Goldberg, M.G. Pandy and S.L. Delp 731 **Contributions of muscle forces and toe-off kinematics to peak knee flexion during the swing phase of normal gait: an induced position analysis**

J.A. Gimbel, J.P. Van Kleunen, S. Mehta, S.M. Perry, G.R. Williams and L.J. Soslowsky — 739 **Supraspinatus tendon organizational and mechanical properties in a chronic rotator cuff tear animal model**

K. Hasegawa, Y. Hasegawa and A. Nagano — 751 **Estimation of bone mineral density and architectural parameters of the distal radius in hemodialysis patients using peripheral quantitative computed tomography**

Short communications

J.K. Green, F.W. Werner, H. Wang, M.M. Weiner, J.M. Sacks and W.H. Short — 757 **Three-dimensional modeling and animation of two carpal bones: a technique**

L. Geris, A. Andreykiv, H.V. Oosterwyck, J.V. Sloten, F.v. Keulen, J. Duyck and I. Naert — 763 **Numerical simulation of tissue differentiation around loaded titanium implants in a bone chamber**

H.W. Ng, E.C. Teo and V.S. Lee — 771 **Statistical factorial analysis on the material property sensitivity of the mechanical responses of the C4–C6 under compression, anterior and posterior shear**

G. Li, E. Most, L.E. DeFrate, J.F. Suggs, T.J. Gill and H.E. Rubash — 779 **Effect of the posterior cruciate ligament on posterior stability of the knee in high flexion**

J.L. Krevolin, M.G. Pandy and J.C. Pearce — 785 **Moment arm of the patellar tendon in the human knee**

Volume 37 Number 6

Borelli Award

M.A.R. Koehl — 789 **Biomechanics of microscopic appendages: functional shifts caused by changes in speed**

Journal of Biomechanics Award

K.B. Shelburne, M.G. Pandy, F.C. Anderson and M.R. Torry — 797 **Pattern of anterior cruciate ligament force in normal walking**

ASB-Microstrain Award 2002

T. Matsumoto, T. Goto, T. Furukawa and M. Sato — 807 **Residual stress and strain in the lamellar unit of the porcine aorta: experiment and analysis**

Young Scientist Post-Doctoral Award

R.R. Neptune, F.E. Zajac and S.A. Kautz — 817 **Muscle mechanical work requirements during normal walking: the energetic cost of raising the body's center-of-mass is significant**

Young Scientist Pre-Doctoral Award

J.M. Donelan, D.W. Shipman, R. Kram and A.D. Kuo — 827 **Mechanical and metabolic requirements for active lateral stabilization in human walking**

M.E. Hahn and L.-S. Chou — 837 **Age-related reduction in sagittal plane center of mass motion during obstacle crossing**

D. Lu, M. Solomonow, B. Zhou, R.V. Baratta and L. Li — 845 **Frequency-dependent changes in neuromuscular responses to cyclic lumbar flexion**

E. Tsepis, G. Giakas, G. Vagenas and A. Georgoulis — 857 **Frequency content asymmetry of the isokinetic curve between ACL deficient and healthy knee**

T.W. Lin, L. Cardenas and L.J. Soslowsky — 865 **Biomechanics of tendon injury and repair**

B.E. Layton, A.M. Sastry, H.Wang, K.A. Sullivan, E.L. Feldman, T.E. Komorowski and M.A. Philbert — 879 **Differences between collagen morphologies, properties and distribution in diabetic and normal biobreeding and Sprague–Dawley rat sciatic nerves**

L.F. Draganich and C.E. Kuo — 889 **The effects of walking speed on obstacle crossing in healthy young and healthy older adults**

K.S. Maluf, M.J. Mueller, M.J. Strube, J.R. Engsberg and J.E. Johnson — 897 **Tendon Achilles lengthening for the treatment of neuropathic ulcers causes a temporary reduction in forefoot pressure associated with changes in plantar flexor power rather than ankle motion during gait**

L. Yin and D.M. Elliott — 907 **A biphasic and transversely isotropic mechanical model for tendon: application to mouse tail fascicles in uniaxial tension**

R. Schachar, W. Herzog and T.R. Leonard — 917 **The effects of muscle stretching and shortening on isometric forces on the descending limb of the force–length relationship**

R. von Eisenhart-Rothe, M. Siebert, C. Bringmann, T. Vogl, K.-H. Englmeier and H. Graichen — 927 **A new in vivo technique for determination of 3D kinematics and contact areas of the patello-femoral and tibio-femoral joint**

Short communications

T.M. Owings and M.D. Grabiner — 935 **Step width variability, but not step length variability or step time variability, discriminates gait of healthy young and older adults during treadmill locomotion**

R. Nalim, K. Pekkan, H.B. Sun and H. Yokota — 939 **Oscillating Couette flow for in vitro cell loading**

D. Vashishth — 943 **Rising crack-growth-resistance behavior in cortical bone: implications for toughness measurements**

Technical note

C. Milgrom, A. Finestone, A. Hamel, V. Mandes, D. Burr and N. Sharkey — 947 **A comparison of bone strain measurements at anatomically relevant sites using surface gauges versus strain gauged bone staples**

953 **Letter to the Editor**

955 **Author's response**

957 **Book review**

Volume 37 Number 7

A.R. Baker, E.L. Abreu, E. Mascha and K.A. Derwin — 959 **Homotypic variation of canine flexor tendons: implications for the design of experimental studies in animal models**

A. Baudouin and D. Hawkins — 969 **Investigation of biomechanical factors affecting rowing performance**

C. Hartmann and A. Delgado — 977 **Numerical simulation of the mechanics of a yeast cell under high hydrostatic pressure**

M.A. Zulliger, P. Fridez, K. Hayashi and N. Stergiopulos — 989 **A strain energy function for arteries accounting for wall composition and structure**

S. Gupta and F.C.T. van der Helm 1001 **Load transfer across the scapula during humeral abduction**

C.S. Gregersen and D.R. Carrier 1011 **Gear ratios at the limb joints of jumping dogs**

P. Beillas, G. Papaioannou, S. Tashman and K.H. Yang 1019 **A new method to investigate in vivo knee behavior using a finite element model of the lower limb**

M. Soncini, A. Redaelli and F.M. Montevecchi 1031 **Myosin head mechanical performance under different conformational change mechanisms**

M. Heise, S. Schmidt, U. Krüger, R. Rückert, S. Rösler, P. Neuhaus and U. Settmacher 1043 **Flow pattern and shear stress distribution of distal end-to-side anastomoses. A comparison of the instantaneous velocity fields obtained by particle image velocimetry**

L. Yang, G. Cai, L. Coulton and M. Saleh 1053 **Knee joint reaction force during tibial diaphyseal lengthening: a study on a rabbit model**

A. Polikeit, L.P. Nolte and S.J. Ferguson 1061 **Simulated influence of osteoporosis and disc degeneration on the load transfer in a lumbar functional spinal unit**

J.C.E. van der Burg (Petra), I. Kingma and J.H. van Dieën 1071 **Is the trunk movement more perturbed after an asymmetric than after a symmetric perturbation during lifting?**

X.H. Liu and X. Wang 1079 **The deformation of an adherent leukocyte under steady shear flow: a numerical study**

L. Morris, P. Delassus, M. Walsh and T. McGloughlin 1087 **A mathematical model to predict the in vivo pulsatile drag forces acting on bifurcated stent grafts used in endovascular treatment of abdominal aortic aneurysms (AAA)**

K. Komatsu, T. Shibata, A. Shimada, A. Viidik and M. Chiba 1097 **Age-related and regional differences in the stress–strain and stress–relaxation behaviours of the rat incisor periodontal ligament**

Short communications

T. Zander, A. Rohlmann and G. Bergmann 1107 **Influence of ligament stiffness on the mechanical behavior of a functional spinal unit**

R. Stagni, A. Leardini, F. Catani and A. Cappello 1113 **A new semi-automated measurement technique based on X-ray pictures for ankle morphometry**

H.E. Gunter 1119 **Modeling mechanical stresses as a factor in the etiology of benign vocal fold lesions**

Volume 37 Number 8

T. Kim, A.Y. Cheer and H.A. Dwyer 1125 **A simulated dye method for flow visualization with a computational model for blood flow**

T.M. Squires, M.S. Weidman, T.C. Hain and H.A. Stone 1137 **A mathematical model for top-shelf vertigo: the role of sedimenting otoconia in BPPV**

S.J. Howarth, A.E. Allison, S.G. Grenier, J. Cholewicki and S.M. McGill 1147 **On the implications of interpreting the stability index: a spine example**

S.P. Davis, B.J. Landis, Z.H. Adams, M.G. Allen and M.R. Prausnitz 1155 **Insertion of microneedles into skin: measurement and prediction of insertion force and needle fracture force**

J.C. Iatridis and I. ap Gwynn 1165 **Mechanisms for mechanical damage in the intervertebral disc annulus fibrosus**

R. Preuss and J. Fung 1177 **A simple method to estimate force plate inertial components in a moving surface**

J. Schramm-Baxter, J. Katrencik and S. Mitragotri 1181 **Jet injection into polyacrylamide gels: investigation of jet injection mechanics**

S.R. Goldberg, F.C. Anderson, M.G. Pandy and S.L. Delp 1189 **Muscles that influence knee flexion velocity in double support: implications for stiff-knee gait**

G. David and J.D. Humphrey 1197 **Redistribution of stress due to a circular hole in a nonlinear anisotropic membrane**

A. Perillo-Marcone, L. Ryd, K. Johnsson and M. Taylor 1205 **A combined RSA and FE study of the implanted proximal tibia: correlation of the post-operative mechanical environment with implant migration**

T.P. Harrigan and E.E. Konofagou 1215 **Estimation of material elastic moduli in elastography: a local method, and an investigation of Poisson's ratio sensitivity**

G. Balooch, G.W. Marshall, S.J. Marshall, O.L. Warren, S.A.S. Asif and M. Balooch 1223 **Evaluation of a new modulus mapping technique to investigate microstructural features of human teeth**

M.J. Voor, J.E. White, J.E. Grieshaber, A.L. Malkani and C.R. Ullrich 1233 **Impacted morselized cancellous bone: mechanical effects of defatting and augmentation with fine hydroxyapatite particles**

C.S. Rajapakse, J.S. Thomsen, J.S.E. Ortiz, S.J. Wimalawansa, E.N. Ebbesen, L. Mosekilde and G.H. Gunaratne 1241 **An expression relating breaking stress and density of trabecular bone**

N.O. Chahine, C.C-B. Wang, C.T. Hung and G.A. Ateshian 1251 **Anisotropic strain-dependent material properties of bovine articular cartilage in the transitional range from tension to compression**

Z. Taylor and K. Miller 1263 **Reassessment of brain elasticity for analysis of biomechanisms of hydrocephalus**

K. Yoshino, T. Motoshige, T. Araki and K. Matsuoka 1271 **Effect of prolonged free-walking fatigue on gait and physiological rhythm**

Short communications

X.N. Dong and X.E. Guo 1281 **The dependence of transversely isotropic elasticity of human femoral cortical bone on porosity**

D.E. Martin, A.E. Severns and J.M. Kabo 1289 **Determination of mechanical stiffness of bone by pQCT measurements: correlation with non-destructive mechanical four-point bending test data**

Volume 37 Number 9

O.S. Sobelman, J.C. Gibeling, S.M. Stover, S.J. Hazelwood, O.C. Yeh, D.R. Shelton and R.B. Martin 1295 **Do microcracks decrease or increase fatigue resistance in cortical bone?**

D.E. Rassier and W. Herzog 1305 **Effects of shortening on stretch-induced force enhancement in single skeletal muscle fibers**

E. Verhulp, B. van Rietbergen and R. Huiskes 1313 **A three-dimensional digital image correlation technique for strain measurements in microstructures**

T.A.L. Wren, K.P. Do and R.M. Kay — 1321 **Gastrocnemius and soleus lengths in cerebral palsy equinus gait—differences between children with and without static contracture and effects of gastrocnemius recession**

S.N. Robinovitch, R. Brumer and J. Maurer — 1329 **Effect of the "squat protective response" on impact velocity during backward falls**

A. Gefen and S.S. Margulies — 1339 **Are in vivo and in situ brain tissues mechanically similar?**

A. Arampatzis, F. Schade and G.-P. Brüggemann — 1353 **Effect of the pole–human body interaction on pole vaulting performance**

K. Seide, N. Weinrich, M.E. Wenzl, D. Wolter and C. Jürgens — 1361 **Three-dimensional load measurements in an external fixator**

X. Jia, M. Zhang and W.C.C. Lee — 1371 **Load transfer mechanics between trans-tibial prosthetic socket and residual limb—dynamic effects**

R. Verdejo and N.J. Mills — 1379 **Heel–shoe interactions and the durability of EVA foam running-shoe midsoles**

J.H. Koolstra and T.M.G.J. van Eijden — 1387 **Functional significance of the coupling between head and jaw movements**

D. Amarantini and L. Martin — 1393 **A method to combine numerical optimization and EMG data for the estimation of joint moments under dynamic conditions**

J.A. Gal, L.M. Gallo, S. Palla, G. Murray and I. Klineberg — 1405 **Analysis of human mandibular mechanics based on screw theory and in vivo data**

E.F. Morgan, H.H. Bayraktar, O.C. Yeh, S. Majumdar, A. Burghardt and T.M. Keaveny — 1413 **Contribution of inter-site variations in architecture to trabecular bone apparent yield strains**

D. Lafond, M. Duarte and F. Prince — 1421 **Comparison of three methods to estimate the center of mass during balance assessment**

Short Communications

A.F. Cordero, H.J.F.M. Koopman and F.C.T. van der Helm — 1427 **Use of pressure insoles to calculate the complete ground reaction forces**

T. Iyo, Y. Maki, N. Sasaki and M. Nakata — 1433 **Anisotropic viscoelastic properties of cortical bone**

J.P. Hunter, R.N. Marshall and P.J. McNair — 1439 **Segment-interaction analysis of the stance limb in sprint running**

L.L. Menegaldo, A. deToledo Fleury and H.I. Weber — 1447 **Moment arms and musculotendon lengths estimation for a three-dimensional lower-limb model**

Corrigenda

D. Lafond, M. Duarte and F. Prince — 1455 **Corrigendum to "Comparison of three methods to estimate the center of mass during balance assessment" [J. Biomech. 37 (2004) 1421–1426]**

J.H. van Dieën, I. Kingma and J.C.E. van der Burg (Petra) — 1457 **Corrigendum to "Evidence for a role of antagonistic cocontraction in controlling trunk stiffness during lifting" [Journal of Biomechanics 36 (2003) 1829–1836]**

Erratum

S.E. Sonenblum, J.J. Crisco, L. Kang and E. Akelman — 1459 **Erratum to "In vivo motion of the scaphotrapezio-trapezoidal (STT) joint" [J. Biomech. 37 (2004) 645–652]**

1463 **Announcements**

Volume 37 Number 10

A.H. Hansen, D.S. Childress, S.C. Miff, S.A. Gard and K.P. Mesplay — 1467 **The human ankle during walking: implications for design of biomimetic ankle prostheses**

P.L. Cheng — 1475 **Joint rotation between two attitudes in the spherical rotation coordinate system**

J.H. Skotte, N. Fallentin, M.T. Pedersen, M. Essendrop, J. Stroyer and B. Schibye — 1483 **Adaptation to sudden unexpected loading of the low back—the effects of repeated trials**

Z. Del Prete, S. Antoniucci, A.H. Hoffman and P. Grigg — 1491 **Viscoelastic properties of skin in Mov-13 and Tsk mice**

L.E. DeFrate, H. Sun, T.J. Gill, H.E. Rubash and G. Li — 1499 **In vivo tibiofemoral contact analysis using 3D MRI-based knee models**

D.-G. Kim, M.A. Miller and K.A. Mann — 1505 **A fatigue damage model for the cement–bone interface**

K.B. Harvey and S.W. Donahue — 1513 **Bending properties, porosity, and ash fraction of black bear (Ursus americanus) cortical bone are not compromised with aging despite annual periods of disuse**

I.R. Titze, R.W. Hitchcock, K. Broadhead, K. Webb, W. Li, S.D. Gray and P.A. Tresco — 1521 **Design and validation of a bioreactor for engineering vocal fold tissues under combined tensile and vibrational stresses**

C.A. Simmons, J. Nikolovski, A.J. Thornton, S. Matlis and D.J. Mooney — 1531 **Mechanical stimulation and mitogen-activated protein kinase signaling independently regulate osteogenic differentiation and mineralization by calcifying vascular cells**

G. Yang, R.C. Crawford and J.H.-C. Wang — 1543 **Proliferation and collagen production of human patellar tendon fibroblasts in response to cyclic uniaxial stretching in serum-free conditions**

S. Hirokawa, T. Ueki and A. Ohtsuki — 1551 **A new approach for surface fitting method of articular joint surfaces**

B. Bernáth, B. Suhai, B. Gerics, G. Csorba, M. Gasparik and G. Horváth — 1561 **Testing the biomechanical optimality of the wall thickness of limb bones in the red fox (*Vulpes vulpes*)**

M.L.T.M. Müller and M.S. Redfern — 1573 **Correlation between EMG and COP onset latency in response to a horizontal platform translation**

K. Boyer and B.M. Nigg — 1583 **Muscle activity in the leg is tuned in response to impact force characteristics**

D.L. Jindrich, A.D. Balakrishnan and J.T. Dennerlein — 1589 **Finger joint impedance during tapping on a computer keyswitch**

M. Viceconti, M. Davinelli, F. Taddei and A. Cappello — 1597 **Automatic generation of accurate subject-specific bone finite element models to be used in clinical studies**

A. Kettler, H. Schmitt, U. Simon, E. Hartwig, L. Kinzl, L. Claes and H.-J. Wilke — 1607 **A new acceleration apparatus for the study of whiplash with human cadaveric cervical spine specimens**

S.I. Rabben, N. Stergiopulos, L.R. Hellevik, O.A. Smiseth, S. Slørdahl, S. Urheim and B. Angelsen — 1615 **An ultrasound-based method for determining pulse wave velocity in superficial arteries**

Short communication

O. Müller, W.J. Parak, M.G. Wiedemann and F. Martini — 1623 **Three-dimensional measurements of the pressure distribution in artificial joints with a capacitive sensor array**

1627 **Book reviews**

1631 **Letter to the Editor**

1633 **Author's response**

1635 **Corrigendum**

Volume 37 Number 11

M.J. Silva, M.D. Brodt, Z. Fan and J.-Y. Rho — 1639 **Nanoindentation and whole-bone bending estimates of material properties in bones from the senescence accelerated mouse SAMP6**

J.R. West, N. Juncosa, M.T. Galloway, G.P. Boivin and D.L. Butler — 1647 **Characterization of in vivo Achilles tendon forces in rabbits during treadmill locomotion at varying speeds and inclinations**

H.M. Toussaint, P.E. Roos and S. Kolmogorov — 1655 **The determination of drag in front crawl swimming**

Y.-L. Sun, Z.-P. Luo, A. Fertala and K.-N. An — 1665 **Stretching type II collagen with optical tweezers**

H.H. Bayraktar and T.M. Keaveny — 1671 **Mechanisms of uniformity of yield strains for trabecular bone**

S. Park, K.D. Costa and G.A. Ateshian — 1679 **Microscale frictional response of bovine articular cartilage from atomic force microscopy**

D.M. Pincivero, Y. Salfetnikov, R.M. Campy and A.J. Coelho — 1689 **Angle- and gender-specific quadriceps femoris muscle recruitment and knee extensor torque**

S.P. Ahir, P.S. Walker, C.J. Squire-Taylor, G.W. Blunn and J.I.L. Bayley — 1699 **Analysis of glenoid fixation for a reversed anatomy fixed-fulcrum shoulder replacement**

S. Ramtani — 1709 **Mechanical modelling of cell/ECM and cell/cell interactions during the contraction of a fibroblast-populated collagen microsphere: theory and model simulation**

P. Wieloch, G. Buchmann, W. Roth and M. Rickert — 1719 **A cryo-jaw designed for in vitro tensile testing of the healing Achilles tendons in rats**

G. Limbert, M. Taylor and J. Middleton — 1723 **Three-dimensional finite element modelling of the human ACL: simulation of passive knee flexion with a stressed and stress-free ACL**

M. Kendall, T. Mitchell and P. Wrighton-Smith 1733 **Intradermal ballistic delivery of micro-particles into excised human skin for pharmaceutical applications**

E. Most, J. Axe, H. Rubash and G. Li 1743 **Sensitivity of the knee joint kinematics calculation to selection of flexion axes**

F. Mouret, V. Garitey, E. Bertrand, F. Derivaux, J. Fuseri and R. Rieu 1749 **In vitro atrial flow dynamics: normal conditions versus atrial fibrillation**

L. Fosse, H. Rønningen, J. Lund-Larsen, P. Benum and L. Grande 1757 **Impacted bone stiffness measured during construction of morsellised bone samples**

M. Prosi, K. Perktold, Z. Ding and M.H. Friedman 1767 **Influence of curvature dynamics on pulsatile coronary artery flow in a realistic bifurcation model**

S. Gupta, F.C.T. van der Helm and F. van Keulen 1777 **Stress analysis of cemented glenoid prostheses in Total Shoulder Arthroplasty**

Short communications

P.S. Donzelli, L.M. Gallo, R.L. Spilker and S. Palla 1787 **Biphasic finite element simulation of the TMJ disc from in vivo kinematic and geometric measurements**

T. Huysmans, B. Haex, R. Van Audekercke, J. Vander Sloten and G. Van der Perre 1793 **Three-dimensional mathematical reconstruction of the spinal shape, based on active contours**

1799 **Book review**

1802 **Corrigendum**

Volume 37 Number 12

M. Stańczyk and B. van Rietbergen 1803 **Thermal analysis of bone cement polymerisation at the cement–bone interface**

M. Pijnappels, M.F. Bobbert and J.H. van Dieën 1811 **Contribution of the support limb in control of angular momentum after tripping**

J. Duyck, M. De Cooman, R. Puers, H. Van Oosterwyck, J.V. Sloten and I. Naert 1819 **A repeated sampling bone chamber methodology for the evaluation of tissue differentiation and bone adaptation around titanium implants under controlled mechanical conditions**

R. Stagni, A. Leardini and A. Ensini 1823 **Ligament fibre recruitment at the human ankle joint complex in passive flexion**

W.J. Wang and R.H. Crompton 1831 **Analysis of the human and ape foot during bipedal standing with implications for the evolution of the foot**

M.L. Costantino, P. Bagnoli, G. Dini, G.B. Fiore, M. Soncini, C. Corno, F. Acocella and R. Colombi 1837 **A numerical and experimental study of compliance and collapsibility of preterm lamb tracheae**

R. Shahar and L. Banks-Sills 1849 **A quasi-static three-dimensional, mathematical, three-body segment model of the canine knee**

W. Winter, S.M. Heckmann and H.P. Weber 1861 **A time-dependent healing function for immediate loaded implants**

S.R. Simon 1869 **Quantification of human motion: gait analysis—benefits and limitations to its application to clinical problems**

P. Cerveri, A. Pedotti and G. Ferrigno	1881	**Evolutionary optimization for robust hierarchical computation of the rotation centres of kinematic chains from reduced ranges of motion the lower spine case**
T.H. Witte and A.M. Wilson	1891	**Accuracy of non-differential GPS for the determination of speed over ground**
J. Chen and X.-Y. Lu	1899	**Numerical investigation of the non-Newtonian blood flow in a bifurcation model with a non-planar branch**
R.C. Ooi, X.Y. Luo, S.B. Chin, A.G. Johnson and N.C. Bird	1913	**The flow of bile in the human cystic duct**
J.P.V. Geest, E.S. Di Martino and D.A. Vorp	1923	**An analysis of the complete strain field within Flexercell™ membranes**
A. Lees, J. Vanrenterghem and D. De Clercq	1929	**Understanding how an arm swing enhances performance in the vertical jump**
E.J. Vanderploeg, S.M. Imler, K.R. Brodkin, A.J. García and M.E. Levenston	1941	**Oscillatory tension differentially modulates matrix metabolism and cytoskeletal organization in chondrocytes and fibrochondrocytes**
	1953	**Erratum**
	1955	**Corrigendum**
	1957	**Announcement**
